This week was dedicated towards finishing our design document. As we get towards the end of the semester, it is important for us to make sure that all of our work this semester has been properly documented and explained. This gave us an opportunity to look back at our project and code and insure that everything was commented and used properly. We also had received feedback on our latest version of the design document on the website, so we broke the work up for different sections and worked on those. After we finished the revisions, we settled on an epoch from the training that we will use for all of our demonstrations in the following week so that we can quickly present without retraining the program.
